URMET GROUP

Features and benefits

Easy Door Controller is a single door controller designed for small residential applications which can easily be integrated to your project and does not require many electrical connections.

Virtual network combines the advantages of standalone and network systems. Thanks to this new technology, you don't need anymore to connect every controller to a single network in order to manage access remotely or on site.

No more expensive IP infrastructure costs, complicated configuration, Easy Door Controller will ensure optimum safety, maximum configuration flexibility and an easy use.

By its small size, Easy Door Controller can also be integrated within door entry systems and matches perfectly with your customer design.

EASY DOOR CONTROLLER

- > Easy wiring
- > Simple programming of the keys
- > Maintenance free
- > Automatic saved data

Virtual network

Read & Write technology.

• Simple and intuitive use

• Search bar Menu

• Key / Door Modifications

• Secure Management

• Event Backup

Standalone mode

Master key solution.

You manage your access control on-site, you have few users and you only need few keys ? Therefore, you can use Easy Door Controller/Receiver simply and easily in standalone mode.

1

Swipe the master key.

Press button 1 of the master remote control to start programming.

2

Enroll the residents' keys by swiping them.

Enroll the residents' remotes by pressing their button 1.

3

Swipe the master key.

Press again the button of the master remote control to end programming.
